Vtech kid connect app not working

CONNECTED TO YOUR CHILD ANYTIME, ANYWHERE. Kid Connect uses an Internet connection to let you interact with your child even when you are away from home – anywhere in the world. Parents can also add family members and friends to the child's friend list, so grand parents can also stay. • KID IS SAFE. All contacts must be approved by their parents before communication can take place. Users who are not on a child's friend list cannot contact your child. • GOOD FOR ALL AGES! Even the youngest children can use Kid Connectors to share voice messages **, pictures*, drawings, stickers, and pre-recorded messages. And as kids grow up, they'll be able to share text messages too! • CHAT GROUP. With Chat Group, your child can communicate and share with several family members or friends at the same time. • SHARE THEIR MOMENTS. Parents can easily share photos** or drawing to their children and posting them to social media sites with a single touch. • IT AM! You can customize your Kid Connect's avatar with your photo, or choose one of several drawing designs. There are also fun stickers and pre-recorded messages. Your child can even use the voice change ** to record a robot voice or a mouse voice! USE KID CONNECTParents:Please enroll your child's VTech device before downloading this app. A parent will receive a Kid Connect ID and password during registration. This parent charges the child's friend list and can use this app to send or approve requests to the child. The other parent will have to sign up for a separate Kid Connect account and be added to their child's list as a friend. Other Family Members: You must receive parent approval before you can contact a child. Once you have signed up for a Kid Connect account, let the child's parent know your Kid ID so that they can send you a friend request.* Kid Connect works with Innotab® MAX and all Innotab® 3S templates only.* A parent must consent to the Child Online Protection Act (COPPA) before their child is allowed to send photos and voice messages. Log in to VTech Parent Account of Learning Lodge for instructions. For more details on VTech, please visit our website: Sep 2, 2020 Version 1.16.3030 The developer, VTech Electronics Limited, did not provide details about its privacy practices and handling of Apple's data. VTech KidiConnect™ Reviews work as well as my most anticipated I was surprised to see all the negative reviews! I bought this for my daughter for Christmas and we haven't had any real issues with the app. He did v-Tech (as opposed to Apple or Google) so we didn't expect that level of technical capabilities with this app (no offense!). Daughter is able to send and receive messages. I could easily add my sister to the app so daughter could connect with her Auntie & , it worked great. The only reason I give it 4 stars is because it's a little slow in receiving/forwarding and I have out the chat and re-enter to see a new message instead of having the new message appear in the chat I'm in. Also, I'm unable to communicate with contact adding to the daughter's phone unless I add that to people in our family but we wanted the family group just to be moms, dads and daughters. Also, one thing to suggest for others, when you sign up, set it up so that it automatically signs you in. I've noticed I've gotten kicked out a couple of times but it just automatically signs me off again. In general, we are very happy with the app. By VTech Kidibuzz Properties 1 Functional and Security Flaws – Be careful to secure your child's app there are both functional and secure issues. In trying to connect to the app, the app status wheel just turned and then after several minutes failed. This happened on multiple iPhones of different generations. Strangely, even if the app fails to connect me to, whenever my child has sent a message to the child's vtech phone to 'parents' I got iOS notifications that they received a message from the child they called. But when clicking on the banner notification it takes me to the connection, which of course, continues to fail. We submitted a supporting ticket, and the answers were we have no troubleshooting for this type of issue at this time. We purchased two of the vtech phones at ~\$80 ea. and this is the support we received. I normally don't the kind of publicly express my opinion, but I want to make sure that others don't have to go through this frustration. VTech Kidibuzz let me just say that this is the biggest disappointment for not only me as a parent but for my six year old that he thought he got a phone to be able to text me. I wouldn't even give this app or this product one star but I had to choose an option. Why is Vtech stealing people's money with a phone that asks this app to text with the phone that DOESN'T EVEN WORK!!! I'm so MAD! I have the exact same problem as many of the other complaints here, can't get logged. Create a connection but the wheel keeps turning and there is no resolution. Try to create a new account but can't get past the security box, just keep restored. So FRUSTRATING!!! Vtech is literally stealing people's money by selling this product that requires an app that is clearly not functioning. Get it TOGETHER VTECH!!!! Not a happy customer!!!! Very DISAPPOINTING!!! My horrible application buys three of the kiddibuzz devices @\$90 a clip. Too many functional issues with this application. The device is way too expensive for the application to fail. He's hitting or missing. He walks but more often it does not work. It frustrated the child and the oldest especially grandparents. The device itself is a great idea but when the application doesn't work, that's disgusting. When trying to use the connected credit app, 3 out of 4 Times it does not work, either an error message appears or a message that your login fails. Shame on you VTech for loading a ginormous price that works with one app that doesn't work 75% of the time! I would not recommend anyone buying the phone at kidibuzz until the application is fixed. Never consistent! My daughter uses this to communicate with her father who is in the military and it is his only way of constant contact with him. The first day he got it, he worked like a champ and I never saw him so happy to finally be able to send and receive messages and beautiful photos with voice messages with his father. That lasted two days and now it will work maybe once in a blue moon. Some days he'll be able to throw things but not receive. The other day he won't be able to do anything and we'll have to delete it and reload it. I've never seen him so devastated his thoughts because his father doesn't like him anymore. Shame on this company for getting kids hope up with a product and using such an insufficient platform. Fix it now! Connections & , Problems My Application registered and paid \$0.50 for my child KidiConnect and they downloaded the app for my iPhone 8+. As I tried to also create a Messenger user ID as a parent for the same account as my child, an error occurred. The idea that my child can text me or contact me with an app of this sort without having the financial burden of a brand new regular cell phone & , plan is composed, however, if you will offer this product, then you should at least have support for it. That is very bad business. The 3 stars are for the only ideal! It would be one for services & , problems. Oof. The app really lacks the marker. First of all, it wasn't even optimized to the X, and we're over a year here. The biggest problem is that my message from my son won't come in. All the reason we bought this for our daughter is because we both work in scheduling and she tends to be hard on it. So he likes to send us little messages when we're at work in and get answers from us. But for the last 4 days now, none of the messages have been packed for myself, my wife, or my son's grandfather. The whole reason we buy this, and it doesn't work. It's lazy programming, and reflected in the vtech value and lack of proudly set of products. They just wanted my money, and they got it. No injuries this has occurred on numerous occasions that I have lost counts. I got the kiddibuzz for my son with high hopes that he can provide an educational tool along with a safe social connection to his family throughout the country in a bridge effort between now and when he's old enough for a Phone. I'm so very disappointed with the connectivity issues. We have a reliable thread and have no consistency with his device. Besides this app is securely epaid with its reception and adequate connection to the device. I have picked up my sign-in again and am able to sign back in OR Reset a password. And there are no links to customer service dealing with the question. I'm beyond frustrated. Terrible UI & , Service can't even Log In Got a new device for my son for Christmas. Open it up and request a straight update off. The update wouldn't install so go back and forth with vtech support for several weeks until they sent me a thump drive with the update on it. Once that is installed, could get on devices but the UI is terrible and had to call in for support again just figure out how to add contact. Now I neither any other family member can log in to the app via our mobile device – it just keeps turning and turning and not allowing anyone who logs in. Support vtech says they can't help. Don't buy! Very disappointed, not to mention how long and money wasted on that. Barely functional app this... serve it for the purpose of letting me interact with my kids, but it's pretty buggy. Adding/Inviting other adults is very confusing and doesn't make sense. I told the other adults that app download and give them my family email address so they could join the family. Then I had the guests again in the app so they could send private messages to my kids. There also doesn't seem to be any control to remove adults from the family... it is a high risk for safety. If someone in the family starts sending my kids bad messages, I'll just have to take KidiBuz phones away, which isn't just them! Most of the emojis don't work. The picture quality is terrible and cannot be turned off. The voice messages are limited to just 10 seconds, which is really short. The response time for everything seems pretty slow. Then there are times where the app will just randomly crash and shut down on its own! Waste of time more than half of my daughter's messages sent to me or to other family members I have not received. We all get notifications that we have a message, open our app– then NOTHING. It's frustrating, we're all frustrated. This is supposed family-friendly. It was an absolute insecticide. I wish it worked because the idea is so beautiful. 1/5 times it works he loves it. He had it on my shoulder and cross his fingers that his little text goes in. Such a shame. Looks like it's been an issue for more than a year from those reviews and it still hasn't been fixed. Bad business. This CRAP FIX We just spent \$80 on your device and our main reason is so our little one can communicate with us when one of us comes out, and we can include it in family messages. The device works great but FIXED THIS APP STUPID!! It's the main reason why we purchase your device and we can't receive its message even if we get a notification that it's Things! I read other reviews to see basically everyone had this problem. There is no reason you can design a product as good as the one we got it and not program this app functioned as a basic messenger!!! FIX IT!!!! NOEL RUINED FOR MY DAUGHTER Buy this item because we wanted to give our daughter the closest thing to a phone. This was supposedly a safe phone came to know it is because it can't even be used. There was password reset after password only has phone saying that the password is invalid. Cant adds any members though he says added. The texts don't happen to my son's phone. Not to mention you can only add people via email and not phone numbers. PARENTS SAVE YOU THE DISAPPOINTMENT PROBLEM AND BUY YOUR CHILD A NEW PHONE AND SET UP THEIR PARENTS' CONTROLS. THESE PRODUCTS ARE A COMPLETE WASTE OF MONEY AND TIME. NOT TO MENTION A DISAPPOINTED CHILD. WOULDNT GIVE IT ONE STAR BUT I OWE SO THAT I CAN WRITE A Poor Performance Review my daughter received a kidibuzz for Christmas thinking she went to can text and interact with mom and dad. Our disappointment follows only possible after adult registration of the device for \$.50 (greatness) and downloading the app, not to mention the requirement for adults to download the app to minimal sending pictures painted back and forth. No but 1 week later the app totally crashes right before my husband left town, completely beating the goal of having a cell phone for an old 6. Disappointed to say the least! Work but it seems the first and first date you have to update the Kidizoom hardware itself or you will be very frustrated. It only last when it fully loaded so open it up and plug in right away and make the update when fully loaded. Plan half a day for this process. I expect developers to keep up-to-date because it looks limited and dating as far as fonceion. I would love to see more vignettes and emojis in the future. A better way to contact apps You can now contact VTech KidiConnect™ customer service directly via emails using our new site – AppContacter.com contact VTech KidiConnect™ directly Yes. VTech KidiConnect™ is quiet to use but used with caution. This is based on our NLP process (Natural Language Process) analysis of more than 481 User Reviews sourced from the Appstore and the cumulative rating of 1.5/5. Justuseapp security note for VTech KidiConnect™ is 21.2/100. Is VTech KidiConnect™ legit? Yes. VTech KidiConnect™ is legit, but not 100 legit US. This conclusion came in by running on 481 VTechConnect™ User Review of Our NLP Machine Learning Process determines whether users believe the app is legitimate or not. Based on this, Justuseapp's Lejumite notes for VTech KidiConnect™ is 21.2/100. Is VTech KidiConnect™ not working? VTech KidiConnect™ working most of the time. If it is not working for you, we recommend that you exercise some patience and retry later or contact Support. Reporting Issues: 8 Not going to connect since the Christmas Day why is what I bought this for my son needs to learn because he wanted a real phone what a waste of money it is dried green will round for days why is this after he made a factory recipe even get the stupid thing started, we now can't get the Kidiconnect to work. It just turns and turns. Very disappointed. Kidiconnect app by app isn't working on kidibuzz G2 by Simon Fish's December 2020 Kididiconnect app just green circular arrows. Was about 3 hours trying to even get into the app but again to be successful. Terrible products. By Jennifer Bryant Dec 25 2020 We just opened this phone for Christmas with the app on the game phone just turning a green circle. It won't be charged. Any suggestions? I paid \$90 for this game so he could send messages and it doesn't work. The app on my phone works fine, but it won't be charged. I paid \$0.50 to unlock, everything is setup. It just won't charge. Won't load hard error codes! My kids are real mad needs to be fixed!!! By Amber Masant Decan 09 2020 can't get a connection. Error code 99 on multiple devices Has a problem with VTech KidiConnect™? Reporting Issue Why Should I Report a Question with VTech KidiConnect™? Pulling problems faced by users like you is a good way to draw attention on VTech KidiConnect™ to your problem using the force of crowd. We've developed a system that will try to get in touch with a company once they report with lots of reporting issues, companies will definitely listen. Importantly, customers can learn from other customers in case the problem is a common problem that has been resolved before. If you're a KidiConnect VTech™ client and are running into a problem, Justuseapp might not be the fastest and most efficient way for you to solve the problem but at least you can warn others of using VTechConnect™. KidiConnect™.
